

Transfer the Backup Camera and Parking Sensor info into the In-Dash / NAV screen on your MERCEDES installation.

The iPMZ6 is a natural Add-on to the Steelmate USA Parking Assist Systems and combines the camera image with the video overlay of the objects distance.

Hideaway Interface Module and Stealth-in-bumper Camera make for a clean and obscure installation. Camera is seen automatically when Reverse is engaged.

For more on the exciting range of iPARK Interface Modules, Cameras, and Monitors, and the world-leading range of Steelmate USA Parking Assist Systems contact Steelmate USA.
